AMACO HIGH FIRE

CELEBRATION HIGH FIRE GLAZES consist of beautiful bright and pastel colors for stoneware that are as colorful as earthenware glazes. These cone 5 glazes are opaque and can be applied over a variety of clays. The final surface appearance varies depending on the clay body. Great when used in contrasting colors. Celebration glazes produce excellent results when used over Sahara or Potter's Choice series glazes. They are a great choice for producing colorful utilitarian ware.

Color #	Description	Prod #	Pint
HF-115	Light Gray (1) O	35501B	\$13.59
HF-120	Dark Blue (1) O	33502C	\$19.89

AMACO HIGH FIRE TEXTURIZERS - TH-1 is a rutile base texturizer which in superposition with other glazes tends to produce a yellowish/orange crystal-type texture. It yields excellent results when applied over or under most Amaco HF series glazes.
